

I strongly urge the FCC to reject petition 04-160 put forth by the National Association of Broadcasters.

I firmly believe in the right of the American people to choose the radio service that best suits their needs, and for my needs the best is XM Satellite radio. XM provides me with the quality and variety I've missed from broadcast radio for many years. I pay for this consumer service, and the National Association of Broadcasters should have no say whatsoever in my relationship with XM's fine service and programming. I live in Pittsburgh, and rely upon and appreciate XM's local traffic and weather reports-- especially since I simply do not listen to broadcast radio, and have not for years. Do not restrict my choices.

So please, support the freedom of information and entertainment that XM represents, and the NAB seeks to squash. Reject petition 04-160.
